

# FB-PLC User's Manual I 【Hardware & Basic】

## CONTENTS

### A. 【Hardware】

#### Chapter 1: FB-PLC Introduction

1.1	Name and Appearance .....	1-1
1.2	External Dimensions .....	1-5
1.3	List of Products .....	1-8
1.4	Function Specifications of Main Units .....	1-10
1.5	Environmental Specifications .....	1-11
1.6	I/O Wiring Diagram of Various Models .....	1-12
1.6.1	FBE Main Units .....	1-12
1.6.2	FBN Main Units .....	1-14
1.6.3	Digital I/O Expansion Units .....	1-15
1.6.4	Digital I/O Expansion Modules .....	1-16
1.6.5	Special Expansion Modules .....	1-21
1.6.6	Power Supply for Expansion Modules .....	1-22

#### Chapter 2: I/O Expansion And System Combination

2.1	I/O Expansion and I/O Number Calculations .....	2-1
2.2	Communication between the PLC and Other Peripheral Systems .....	2-2

#### Chapter 3: Installation Precautions

3.1	Installation Environment .....	3-1
3.2	Layout of Control Board and Mounting of the PLC .....	3-1
3.3	Precautions in Construction and Wiring .....	3-3

#### Chapter 4: Power Supply Wiring and Power Calculation

4.1	Precautions in AC Power Specification and Wiring .....	4-1
4.2	DC Power Specifications and Wiring Precautions .....	4-2
4.3	Calculations of Allowable Current Capacity of Main/Expansion Unit, and Current Consumption of Expansion Modules .....	4-4

4.3.1	Allowed Current Capacity of Main Unit/Expansion Unit	4-4
4.3.2	Current Consumption of Expansion Modules	4-5

## Chapter 5: Digital Input Circuit

5.1	Digital Input (DI) Specifications	5-1
5.2	Structure and Wiring of FBN DC5V High Speed Differential Input Circuit	5-2
5.3	DC24V Single End Input	5-3
5.3.1	Structure and Wiring of DC24V Single End Input Circuit	5-3
5.3.2	Setting Procedure of SINK or SOURCE Input Type of DC24V Input Circuit	5-4
5.3.3	Structure and Wiring of DC24V Single End Input Circuit of High Density	5-5

## Chapter 6: Digital Output Circuit

6.1	Digital Output (DO) Specifications	6-2
6.2	Structure and Connection of DC5V Line Driver High Speed Differential Output	6-3
6.3	Single End Digital Output	6-3
6.3.1	Structure and Connection of Single End Transistor Output	6-3
6.3.2	Increasing the Response Speed of Transistor Output Circuit	6-5
6.3.3	Setting Procedure of Single End SINK or SOURCE Transistor Output	6-5
6.3.4	Transistor Output Circuit of High Density Module	6-6
6.3.5	Protection and Noise Suppression of Transistor Output Circuit	6-7
6.3.6	Structure and Connection of Relay Output Circuit	6-7
6.3.7	Protection and Noise suppression of Relay Contact	6-8
6.3.8	Structure and Connection of TRIAC Output Circuit	6-9

## Chapter 7: Test Run, Monitor and Maintenance

7.1	Inspection Prior to First Time Power Up after Completion of Installation	7-1
7.2	Operational Test and Monitoring	7-1
7.3	LED Indicator on PLC Panel and Determination of its Abnormality	7-2
7.4	Maintenance	7-4

## B. 【Basic】

### Chapter 1: PLC Ladder Diagram and the Coding Rules of Mnemonic

1.1	The Operation Principle of Ladder Diagram	1-1
1.1.1	Combination Logic	1-1
1.1.2	Sequential Logic	1-2
1.2	Differences Between the Conventional and PLC Ladder Diagram	1-3
1.3	Ladder Diagram Structure and Terminology	1-5
1.4	The Coding Rules of Mnemonic	1-8
1.5	The De-Composition of a Network	1-11
1.6	Using Temporary Relays	1-12
1.7	Program Simplification Techniques	1-13

### Chapter 2: FP-07 Programming Panel

2.1	Introduction to FP-07	2-1
2.1.1	Appearance	2-1
2.1.2	Keypads Arrangement	2-2
2.1.3	EPROM/EEPROM Writer	2-2
2.1.4	RS-232C Communication Port	2-3
2.1.5	Interface Connection between FP-07 and PLC	2-3
2.2	Program Edit, Run, Monitor, Forced Set/Reset and Enable/Disable	2-3
2.2.1	Program Edit	2-3
2.2.2	Program RUN	2-6
2.2.3	Program Execution Monitoring	2-7
2.2.4	Forced Set/Reset and Enable/Disable of Digital Status	2-9
2.2.5	Set the Register Data	2-10
2.3	The Functions of FP-07	2-12
2.3.1	Functions List	2-12
2.3.2	Operation Flowchart	2-14
2.4	Introduction to SYSTEM MODE Operation	2-16
2.4.1	CLEAR/INITIAL	2-16
2.4.1.1	Clear Program	2-16

2.4.1.2	Clear Register .....	2-17
2.4.1.3	Clear Coil Status .....	2-17
2.4.1.4	Enable All Digital .....	2-17
2.4.1.5	System Initial .....	2-18
2.4.1.6	Disable All Digital .....	2-18
2.4.2	COPY/COMPARE .....	2-18
2.4.2.1	Save Program (PLC→PACK) .....	2-18
2.4.2.2	Save the Register (PLC→PACK) .....	2-19
2.4.2.3	Load Program (PACK→PLC) .....	2-19
2.4.2.4	Load Register (PACK→PLC) .....	2-20
2.4.2.5	Rom Pack Copy (PACK→PACK) .....	2-20
2.4.2.6	Compare Program (PACK↔PLC) .....	2-21
2.4.2.7	Compare Program (PACK↔PACK) .....	2-21
2.4.2.8	Watch Pack Program .....	2-22
2.4.2.9	Rom Pack Blank Check .....	2-22
2.4.2.10	Save Program (PLC→BUFFER) .....	2-23
2.4.3	PASSWORD/ID Setting .....	2-24
2.4.3.1	Password Open .....	2-24
2.4.3.2	Password Close .....	2-25
2.4.3.3	Password Setting .....	2-25
2.4.3.4	Program ID Setting .....	2-26
2.4.3.5	PLC ID Setting .....	2-26
2.4.4	Program and Register Data PRINT OUT .....	2-27
2.4.4.1	Print Mnemonic .....	2-29
2.4.4.2	Print Mnemonic with Document .....	2-29
2.4.4.3	Print Program .....	2-30
2.4.4.4	Print Program with Document .....	2-30
2.4.4.5	Print Cross-Reference .....	2-31
2.4.4.6	Print Register Data .....	2-31
2.4.5	CONFIGURATION .....	2-32
2.4.5.1	Retentive/Non Retentive Internal Coil Partition .....	2-33
2.4.5.2	Retentive/Non Retentive Step Coil Partition .....	2-33

2.4.5.3	0.01S~1S Timer Partition	2-34
2.4.5.4	Retentive/Non Retentive 16-Bit Counter Partition	2-34
2.4.5.5	Retentive/Non Retentive 32-Bit Counter Partition	2-35
2.4.5.6	Retentive/Non Retentive Data Register Partition	2-35
2.4.5.7	Read-Only Register Assignment	2-36
2.4.5.8	High-Speed Counter, High-Speed timer (TB=0.1mS) and external interrupts	2-36
2.4.5.9	Station Number Setting	2-37
2.4.5.10	Maximum Frequency Setting (X0~X15)	2-37
2.4.5.11	Define Mode of High-Speed Pulse Output (HSPSO)	2-38
2.4.5.12	Define Normal Polarity of High-Speed Pulse Output (HSPSO)	2-38
2.4.6	SYSTEM MESSAGE	2-39
2.4.7	AS A TC ACCESS PANEL	2-40
2.4.7.1	Change PP to TCAP Mode	2-40
2.4.7.2	Operation of TCAP Mode	2-41
2.4.7.3	Changes from TCAP Mode to PP Mode	2-44
2.5	Operation of EDIT MODE	2-45
2.5.1	EDIT PROGRAM	2-45
2.5.1.1	Sequential Instruction Editing	2-47
2.5.1.1.1	Fundamental Key Operations of Sequential Instruction	2-47
2.5.1.1.2	Input the Instruction	2-49
2.5.1.1.3	Insert the Instruction	2-49
2.5.1.1.4	Change Instruction	2-50
2.5.1.1.5	Delete Instruction	2-50
2.5.1.1.6	Edit the Element Documents	2-51
2.5.1.2	Edit Function Instruction	2-52
2.5.1.3	Search Program	2-54
2.5.1.3.1	Search Address	2-54
2.5.1.3.2	Search Instruction	2-55
2.5.2	EDIT REGISTER DATA	2-58
2.5.3	SYNTAX CHECK	2-61
2.5.3.1	Key Operation of Syntax Check	2-62
2.5.3.2	Syntax Error List	2-62

2.5.4	MOVE(HR→ROR).....	2-64
2.5.5	CHECK DOUBLE COIL/T/C.....	2-64
2.5.6	EDIT HSPSO INSTRUCTION.....	2-65
2.5.6.1	Fundamental Key Process of HSPSO Instruction .....	2-66
2.5.6.2	Supplementary Editing Keys for NC Program Editing .....	2-67
2.5.6.3	Editing Example .....	2-68
2.5.7	EDIT LINK INSTRUCTION.....	2-69
2.5.7.1	Supplementary Editing Keys.....	2-70
2.5.7.2	Editing Example .....	2-70
2.5.8	EDIT DOCUMENT .....	2-71
2.6	The Operation of MONITOR MODE .....	2-72
2.6.1	STATUS/DATA MONITORING.....	2-72
2.6.1.1	Digital Status Monitoring .....	2-73
2.6.1.2	Register Data Monitoring .....	2-73
2.6.1.3	Change the Register Data .....	2-74
2.6.2	PROGRAM MONITORING.....	2-74
2.7	PLC Run/stop control .....	2-75

## Chapter 3: FB-PLC Memory Allocation

3.1	FB-PLC Memory Allocation.....	3-1
3.2	Digital and Register Allocations.....	3-2
3.3	Special Relay Details .....	3-3
3.4	Special Registers Details.....	3-6

## Chapter 4: FB-PLC Instruction Lists

4.1	Sequential Instructions.....	4-1
4.2	Function Instructions .....	4-2

## Chapter 5: Sequential Instructions

5.1	Valid range of the Operand of Sequential Instructions .....	5-1
5.2	Element Description .....	5-2
5.2.1	Characteristics of A, B, TU and TD Contacts .....	5-2
5.2.2	OPEN and SHORT Contact .....	5-3

5.2.3	Output Coil and Inverse Output Coil	5-4
5.2.4	Latching Output Coil	5-4
5.3	Node Operation Instructions	5-5

## Chapter 6: Description of Function Instructions

6.1	The Format of Function Instructions	6-1
6.1.1	Input Control	6-1
6.1.2	Instruction Number and Derivative Instructions	6-2
6.1.3	Operand	6-3
6.1.4	Functions Output (FO)	6-6
6.2	Use Index Register(XR) for Indirect Addressing	6-6
6.3	Numbering System	6-8
6.3.1	Binary Code and Relative Terminologies	6-8
6.3.2	The Coding of Numeric Numbers for FB-PLC	6-9
6.3.3	Range of Numeric Value	6-9
6.3.4	Representation of Numeric Value	6-9
6.3.5	Representation of Negative Number	6-10
6.4	Overflow and Underflow of Increment(+1) or Decrement(-1)	6-10
6.5	Carry and Borrow in Addition/Subtraction	6-11

## Chapter 7: Basic Function Instruction

## Chapter 8: Step Instruction Description

8.1	The Operation Principle of Step Ladder Diagram	8-1
8.2	Basic Formation of Step Ladder Diagram	8-2
8.3	Instruction of Step Introduction: STP, FROM, TO, and STPEND	8-5
8.4	Notes for Writing a Step Ladder Diagram	8-11
8.5	Application Examples	8-15
8.6	Syntax Check Error Codes for Step Instruction	8-22
